Sustainable Organization Management
Institute of Management

3rd International Scientific Conference of the PUEB Institute of Management

SUSTAINABLE ORGANIZATION MANAGEMENT

Join us for the third edition of the conference on Sustainable Organization Management, hosted by the Institute of Management at the Poznań University of Economics and Business (PUEB). Building upon our commitment to addressing particularly pressing business challenges and strategic research directions, this conference serves as a platform to unite scholars and practitioners in exploring innovative solutions for sustainable management practices.

We are proud to announce Samsung Electronics Poland Manufacturing Sp. z o.o. (SEPM) as our strategic partner for this year's event. The company is constantly striving to develop modern technologies, which it achieves through, among other things, investment initiatives and the optimization of production and logistics processes.

The conference themes revolve around striking a balance between societal needs and environmental sustainability (sustainable production and consumption), the real world and the virtual world (digital ecology) and, as in the previous edition, between economic and social goals (sustainable development management).
